Experience

L'Albatros training center

Ait Ourir

Sep 2021-Feb 2022

- I worked in l'Albatros training center for about six months as an English tutor to a class of highschool students who were very enthusiastic and eager to learn the language. It was a positive experience that taught me to be more patient, gentle, and creative in conveying the information.

Freelance work

2010-2014

- I was always annoyed when I found that there aren't that much resources in Arabic online as opposed to English, so I decided to translate anything that seemed valuable and worthy of attention like articles, poems and also adding subtitles to movies, anime, songs etc. This experience made me realize that translation is a very intricate and precise process that needs to be approached with utmost care and knowledge of both languages.
